

# HAPPY AK

**BENINCA****TRANSMITTERS WITH DOUBLE CODING,  
ADVANCED ROLLING CODE AND FIXED CODE**Compatible with the most common fixed code transmitters

2 and 4 channels

**Training**

Guide to the procedure of copying fixed codes and enabling ARC codes. Watch the video.

- 2 or 4-channel transmitter with double coding, Advanced Rolling Code and Fixed Code, with wine-red interchangeable cover with soft lines and essential design
- The new ARC coding guarantees maximum security due to the length of the transmitted code (128 bit) and the high number of possible combinations
- The transmitter allows expanding the convenience of remote duplication (without having access to the installation), typical of Fixed Codes, even with ARC. HAPPY.AK transmitters can become duplicates of fixed code transmitters, but they can also be enabled to operate systems with Advanced Rolling Code
- It is possible to associate each button with different types of coding (Advanced Rolling Code or Fixed Code) independently
- Covers in three different colours are available as accessories, respectively for the version with 2 or 4 channels (FLIP.2/FLIP.4)
- Easy access to the battery and to the transmitter type, located on the front under the coloured cover

**AUTOMATISMI BENINCÀ SpA** • Via del Capitello, 45 • 36066 Sandrigo (VI) ITALY • T +39 0444 751030 • sales@beninca.com**FLIP.2**
