Guide to the procedure of copying fixed codes and enabling ARC codes. Watch the video.

- 2 or 4-channel transmitter with double coding, Advanced Rolling Code and Fixed Code
- The new ARC coding guarantees maximum security due to the length of the transmitted code (128 bit) and the high number of possible combinations
- The transmitter allows expanding the convenience of remote duplication (without having access to the installation), typical of Fixed Codes, even with ARC. TO.GO2/4AK transmitters can become duplicates of fixed code transmitters, but they can also be enabled to operate systems with Advanced Rolling Code
- It is possible to associate each button with different types of coding (Advanced Rolling Code or Fixed Code) independently
- Equipped with 12 V battery for long lifespan
- Long range, up to 230 m in a free area
- Car accessory (TO.CLIP) or wall accessory (SMART) available
